JOURNAL
OF MECHANICAL ENGINEERING, SCIENCE, AND INNOVATION

Volume 5, No. 1, April 2025

Characteristics of Char and Tar from the Pyrolysis Process of Brem Waste with Temperature Variations Using a Rotary Kiln System
Farid Majedi, Anatasya Bella Dwi Harito, Fathonah Githa Setya Ningrum, Muhammad Ibadurrochim, Muhammad Arijal Fathurrohman Fauzi1, Limade Gie Inel, Karine Efrida Rosy, and Dery Anton Daniswari

Performance of a Single Cylinder Diesel Engine Fueled by 40% Biodiesel Blend with Excess Air System
Risco Eka Firdausah, Nasrul Ilminnafi1, and Mochamad Asrofi

Evaluating the Impact of Alternative Material-Based Catalytic Converters on Automotive Exhaust Emissions
Sudirman Rizki Ariyanto, Warju, Lailatus Sa'diyah Yuniar Arifianti, Komarudin, and Ata Syifa'Nugraha

Aerodynamic Analysis of Diffuser with Airfoil-Based Curved Geometry Across Various Prototypes
Galang Baruna Ramadhan, I Kade Wiratama, and I Wayan Joniarta

Comparative Assessment of Spot Welding and Lock Seam on Automotive Inner Tubes for QCDSM and Product Lifecycle Sustainability
Hikari Qurrata'ain Nurhadi, Mustofa, Edwin Sahrial Solih, and Ridho Hans Gurning

Enhancement of Solar Panel Efficiency by Comparative Analysis of Cooling Systems Utilizing Water Flow, Air Flow, and No Cooling
Rifaldo Pido, Rahmad Hidayat Boli, and Randy Rianto Day

Production and Characteristics Test of Bio-Char Briquettes from Coconut Shells and Corncobs to Optimize Agricultural Waste in Indonesia
Adriansyah Karunia Ramadhana, Muhamad Farhan Hidayat, Muhaji, and Muhamad Yunus Abdullah

Quantum Mechanics Approach for Metal-Organic Frameworks Deformation Effect on Carbon Capture Performance: A Density Functional Theory Study
Krisna Dwipa Muhdi, Ahmad Atif Fikri

Innovative Structural Evaluation of a Dual-Function Cane for Elderly Mobility: A Finite Element Analysis Approach Using SolidWorks
Hadad Rafana Mugandy, Apip Amrullah, Ma'ruf, and Rizal Mahmud
